PROFESSIONAL EXPERIENCE

Senior Software Engineer | Orion Innovation

Aug 2024 – Present

- Built an asynchronous payment workflow leveraging AWS Step Functions, enabling steps to be retried, postponed, or controlled externally.
- Optimized CI/CD pipeline by replacing Makefile with Esbuild, significantly reducing build times.

Software Engineer | Akinon

Aug 2023 - Aug 2024

- Implemented components within a monorepo structure to facilitate the integration of third-party apps into the admin panel.
- Created a new UI Kit utilized across 5+ e-commerce admin panels, and maintained the existing panel libraries.

Software Engineer | Uppercasebrands

Sep 2021 - Jul 2023

- Managed the entire lifecycle of a SaaS application on the Shopify platform, leading frontend, backend, and DevOps operations. Developed two microservices, designed system architecture, and implemented CI/CD pipelines and OAuth flows.
- Built multiple e-commerce websites by implementing Figma designs.

PROJECTS

portfolio.aliving.app

Developed a software engineering blog to document technical solutions, share code architecture, and contribute resources to the developer community.

english.aliving.app

Architected an AWS-powered application integrating AI text-to-speech APIs. Statically generated over 1,000 pages to eliminate compute cost, and designed a single-table NoSQL database with advanced search functionality.

github.com/hahuaz/cdk-examples

Developed Infrastructure as Code (IaC) patterns and workflows using AWS CDK.

SKILLS

- | | |
|-----------------------------------|--------------------------|
| • TypeScript, JavaScript, Node.js | • HTML & CSS |
| • React, Next.js, Vue.js | • Infrastructure as Code |
| • AWS Serverless & On-Premises | • Shopify, Liquid |
| • Python, Django | • Docker |

CERTIFICATIONS

- 2023/03/17 - AWS Architecting
- 2023/02/16 - AWS Serverless
